

# *“Originality is simply a pair of fresh eyes”*

We get conditioned by the past and our own limitations. We must learn to look at problems and situations from a totally fresh angle without getting prejudiced or biased from the past or other’s opinions. Following the beaten track will not lead us to new roads. Very often, what is required is totally a fresh thinking and a radically different approach to solve a problem. **It is also fresh thought and fresh action.**
