

“Craftsman Principle”

*A tourist curiously asked a craftsman
Making elephant;*

*“How do you make this beautiful elephant from a
log of wood ?*

*The Craftsman replied ; “ It is simple ,I just remove
those wood which does not look like an elephant”*

*The same principle is applicable to achievement of
our goals. We should eliminate /stop doing activities
which will not contribute to our goals. We should
focus only on the goal like craftsman visualize the
elephant. We have to develop a “**Not -to- do**” list
which is powerful than **To-do** list*
