

“A good book can change OUR Life”

Most CEOs and executives read 4-5 books per month

"I went to Amazon and looked at the medium average number of words per book, and it came out to about 64,000 words. So let's say the average person reads 200 words per minute. We're talking about 320 minutes to get through a book, which is about 45 minutes a day, to read a book per week. That makes it a little more realistic -" *Jim KWIK brain fitness expert*
